Introduce

My name is Hai. A 4th year student at the Academy of Posts and Telecommunications Technology.

With a passion for learning, I want to do an internship early to gain experience and gain experience.

My goal is to become a professional fullstacks programmer within the next 3-4 years. Further, I am a Leader, Manager,...

Career Objective:

1 : To become a professional Back-end developer within the next 1-2 years, building on my current knowledge and further deepening my understanding of technology to enhance my expertise. I aim to participate in projects to maximize my potential, gain experience in project implementation, and become proficient in Front-end and Back-end technologies.

2 : To commit long-term to my work, participate in the development of large-scale projects, and become a technology expert. My role will involve analyzing customer requirements, designing systems, and overseeing the Developer team to ensure that they follow the design (during the construction, operation, and expansion of the system).
